Full-Stack Developer with a keen eye for detail, excellent problem-solving and interpersonal skills. Demonstrated skills to efficiently translate creative ideas into stable and high-performing web applications through strong analytical and creative skills. Proficient with writing clear, concise, and effective web development code using current best practices.

EDUCATION

- **Learning Golang** – Udemy (03/2024 - 05/2024)
- **Learn to Code with Ruby** – Udemy (01/2024 - 03/2024)
- **Full-Stack Web Development** – CareerFoundry, Berlin (10/2022 - 11/2023)
- **Juris Doctor** – GGU School of Law, San Francisco (08/2010 -05/2013)
- **Bachelor Degree** -- (Honors) UC Berkeley (06/1997-08/2000)

LANGUAGES

- **Native**: English, Spanish
- **Advanced (C1)**: German, Italian
- **Intermediate (A2)**: Catalan

TECHNICAL SKILLS

Front-End Development:

- Languages/Technologies: HTML, CSS, JavaScript
- Frameworks/Libraries: jQuery, NodeJs, Redux, Bootstrap, Vue.Js, Tailwind CSS
- Testing: Code linting, accessibility testing, unit testing (Jest), integration testing (Cucumber), end-to-end testing (Puppeteer)
- UX/UI: Responsive design, modals, touch interactions
- Development Practices: Test & Behavior Driven Development (TDD/BDD), continuous integration/delivery (CI/CD), functional & object oriented programming
- Mobile Development: React Native, Expo, Progressive Web Apps (PWA)

Back-End Development:

- Languages/Technologies: Node.js, Express.js, Ruby, GO, C#
- APIs: JSON, RESTful APIs, Postman
- Databases: PostgreSQL, MongoDB
- Authentication: JWT, middleware-based authorization
- Cloud Services: AWS, Google Firestore, Netlify, Heroku, GitHub Pages

Development Tools:

- Version Control: Git, GitHub, GitBlit
- IDEs: Sublime, Atom, Visual Studio Code
- Collaboration Tools: Trello, Slack, Zoom, Meet, Skype, Microsoft Teams
- Debugging: Chrome Dev Tools, Android Studio

PROFESSIONAL EXPERIENCE

Frontend Developer, The Pool GmbH & Co., Berlin, DE — **01/2025 - 05/2025**

- Developed dynamic and complex web applications using Vue Js and Tailwind CSS for the optimization of the company website and stock supply management tools while working closely with UX/UI designers to further streamline regional food and beverage distribution in Berlin and Northern Germany.

Full Stack Developer, twrk, Inc., Moreno Valley, CA — **06/2024 - 01/2025**

- Spearheaded development, testing and deployment of TWRK tools using cutting-edge technologies, revolutionizing job search processes across the United States.

Full Stack Developer, Quote Machine, Cape Cod, MA — **06/2024 - 01/2025**

- Assisted with design and implementation of a relational database schema, developed and maintained APIs, and contributed to automation with shell scripting for database backups and reports.
- Worked on full-stack technologies including HTML, CSS, JavaScript, React, Node.Js, MySQL, JSON, Git, GitHub, and integrated AI-driven tools for rapid deployment.

Spanish Teacher, Renée Sintenis Schule, Berlin, DE — **11/2023 - 12/2024**

- Developed interactive learning materials for students in grades 1-6, fostering an inclusive environment that bridges cultural and linguistic divides.

Legal Advisor, ReviverMX, San Francisco, CA — **06/2013 - 06/2020**

- Advised the tech startup on corporate structuring and managed legal filings, reducing liability and improving operational efficiency.
- Negotiated early resolutions for disputes, ensuring favorable outcomes for the company.

Associate Attorney, Hanna Brophy, Oakland, CA — **06/2014 - 09/2018**

- Managed over 150 active legal cases, leading daily communications with clients and opposing counsel. Trained claim adjusters to improve legal claim resolution strategies, reducing overall liability, and negotiated early resolution of disputed claim files.

PROJECT HIGHLIGHTS

myFlix — Fullstack Web App — **05/2023 - 07/2023**

- Designed and implemented a non-relational MongoDB database to store movie information, including descriptions, director details, and release dates.
- Developed a REST API with Node.js and Express using Mongoose for database interaction, and deployed the app on Netlify.
- Utilized Postman for testing API endpoints and wrote detailed documentation for seamless user integration.

ChatApp — Progressive Web App — **07/2023 - 09/2023**

- Built a cross-platform, offline available PWA using React Native, allowing users to display event lists and charts from Google calendar.
- Employed Test-Driven Development (TDD) for unit and integration testing with Jest, Cucumber for acceptance testing, and Puppeteer for end-to-end testing.

Budget Tracker — Progressive Web App — **07/2023 - 09/2023**

- Built a cross-platform, highly interactive and responsive PWA using React, React-query, typescript, Next.js, and Tailwind CSS.
- Implemented clerk and Prisma.io to ensure client authentication while allowing for seamless integration of elements and features.
